Storage size cheat sheet

The five collected-storage units and the floor-area conversions, on one page.

The five unit sizes

Unit	Inside L × W × H (m)	Volume m³	Usable m³	Floor sq ft	Roughly holds
XL	2.45 × 1.55 × 2.45	9.30	7.91	41	A king bed, three-seater sofa, three-door wardrobe, six-seat dining table and six chairs (6.90 m³).
Full	2.35 × 1.16 × 2.09	5.70	4.85	29	A king bed and mattress, a three-seater sofa, a chest of drawers and five medium boxes (4.20 m³).
Half	1.15 × 1.16 × 2.09	2.79	2.37	14	A queen bed and mattress (1.50 m³) and a chest of drawers (0.60 m³).
Quarter	1.10 × 1.16 × 1.05	1.34	1.14	14	A two-seater sofa (1.00 m³), or about twelve medium boxes.
Mini	1.13 × 0.74 × 0.75	0.63	0.54	9	About six medium boxes (0.08 m³ each).

Usable volume is 85% of the total, because nothing stacks on a sofa, a mattress or a fridge and you need an aisle. One cubic metre is one CBM.

Square feet to cubic metres (CBM)

Floor area	Floor	CBM at 1.8 m	At 2.0 m	At 2.4 m
25 sq ft	2.3 m²	4.2	4.6	5.6
50 sq ft	4.6 m²	8.4	9.3	11.1
100 sq ft	9.3 m²	16.7	18.6	22.3
150 sq ft	13.9 m²	25.1	27.9	33.4
200 sq ft	18.6 m²	33.4	37.2	44.6

m² = sq ft ÷ 10.764. CBM = m² × the height you will really stack to. We use 1.8 m.

What homes usually take

Home	Average	Units
Studio	8 m³	1 XL + 1 Mini
1 bedroom	15 m³	2 XL
2 bedrooms	25 m³	2 XL + 2 Full
3 bedrooms	35 m³	4 XL + 1 Full
4 bed villa	50 m³	6 XL + 1 Half + 1 Mini

Averages. From two bedrooms up, a home listed item by item usually comes to about a third less.

> **Count your own.** The averages carry a margin for the things people forget. The calculator adds up your furniture room by room: storageinuae.com/storage-calculator/
